The image shows the login screen of a ZyXEL P-660HW-T1 v3 router. The interface has a blue header with the ZyXEL logo. Below the header, the model number 'P-660HW-T1 v3' is displayed. A welcome message 'Welcome to your router Configuration Interface' is followed by the instruction 'Enter your password and press enter or click "Login"'. There is a password input field with a key icon and the label 'Password:'. Below the input field are two buttons: 'Login' and 'Cancel'. A red arrow points to the 'Login' button.

در کادر روبرو  
PASSWORD:ADMIN  
را وارد می کنیم.

# ZyXEL

## Please select Wizard or Advanced mode

The Wizard setup walks you through the most common configuration settings. We suggest you use this mode if it is the first time you are setting up your router or if you need to make basic configuration changes.

Use Advanced mode if you need access to more advanced features not included in Wizard mode.

- ☒ **Go to Wizard setup**
- ☐ **Go to Advanced setup**
- ☐ **Click here to always start with the Advanced setup.**

Apply

Exit

## INTERNET/WIRELESS SETUP

**ZyXEL**

STEP 1 > STEP 2

### Internet Configuration

#### ISP Parameters for Internet Access

Please verify the following settings with your Internet Service Provider (ISP). Your ISP may have given you a welcome letter or network setup letter including this information.

Name

Mode

Select 'Routing' (default) if your ISP allows multiple computers to share an Internet account. Otherwise, select 'Bridge' mode.

Encapsulation

Select the encapsulation method used by your ISP. Your ISP may list 'ENET ENCAP' as 'Static IP' or 'Dynamic IP'.

Multiplexing

Select the multiplexing type used by your ISP.

#### Virtual Circuit ID

VPI

VCI

Select the VPI (Virtual Path Identifier) and VCI (Virtual Channel Identifier) used by your ISP. The valid range for the VPI is 0 to 255 and VCI is 32 to 65535.

STEP 1STEP 2

**Wireless LAN**

**Wireless**

☒ **Active**

**Network Name(SSID)**   
Give your network a name. You will search for this name from your wireless clients.

**Channel Selection**   
Your router can use one of several channels. You should use the default channel unless other wireless networks nearby use the same channel.

**Security Mode**   
Use this option if you would prefer to create your own key, WPA is stronger than WEP but not all devices are compatible with WPA.

**INTERNET/WIRELESS SETUP** **ZyXEL**

STEP 1 → **STEP 2**

**Wireless LAN**

**WPA Pre-Shared Key Setup**

**Pre-Shared Key**

"WPA-PSK" uses a "Pre-Shared Key" to authenticate wireless users and make sure they are allowed to access your network. Think of this pre-shared key as a shared password that you must know to get on the network. The pre-shared key should be at least 8 characters in length and made up of both letters and numbers. This pre-shared key is recommended to be different from the password you use to access this router or use to log-in to your ISP.

**INTERNET/WIRELESS SETUP****ZyXEL**

STEP 1 ▶ STEP 2

**Wireless LAN**

Please Click the **Apply** Button to Complete the Connection Wizard.

**Note:**  
If you are currently using a Wireless PC card to access this router AND you made changes to the Name(SSID), then you will need to make the same changes to your Wireless PC card AFTER you click the Finish Button.  
  
Once the changes have been made to the Wireless PC card, you will be able to connect back to the router and continue the configuration process.
